Trick: Use a fathah on it and pronounce it taking air inside your mount (inhale). Your face

will have no smiling circle while pronouncing it. Hence we call them Angry Letter.
Formally back of the tongue is raised to the upper roof of mouth.
2. Light (Tarqeeq) Letters: Remaining letters are light.
Trick: Add a fathah on it and pronounce it with a smile on your face and exhaling air from the mouth. Hence we can call them Smiling Letters

Sounds

Diphthongs in Arabic are vowel sounds consisting of two parts, a short vowel (here Fat ha) and a consonant (here و and ى(, the consonant must have a sakin on it. They are ay and aw. Its length will be 2x like long vowel.

• Pattern for Diphthong:

80

ـِيْpronounced as "aay" ـِوْ pronounced as "aao"

• It will be 2x long and there will be explicit sakin on both و and ي

116

Hamzatul Wasl ٱ

Hamzatul Wasl ٱ can be placed:

1. At the Beginning: A set of rules are needed.

2. In the Middle: It has 2 cases

(a) The previous letter has short vowel/long vowel (not double vowel or Tanween). The rule is simple, just ignore it and read using previous letter to its next one.

(b) Special Case: Previous letter has a tanween (double vowel)
