بِسْمِ ٱللَّهِ ٱلرَّحْمَٰنِ ٱلرَّحِيمِ

In the name of Allah, Most Gracious, Most Merciful

CSE 4107
Structured Programming I

Topic: Introduction to Course & Evaluation Criteria

Asaduzzaman Herok
Lecturer | CSE | IUT
asaduzzaman34@iut-dhaka.edu

Course Instructor

Asaduzzaman Herok
Lecturer
Department of Computer Science and Engineering
Islamic University of Technology

Education:

B.Sc in Computer Science and Engineering (2022)
Islamic University of Technology, Gazipur, Bangladesh

Higher Secondary Certificate (2017)
Notre Dame College, Dhaka

Secondary School Certificate (2015)
Daulatpur Pilot High School, Daulatpur, Kushtia

EXPERIENCE

Lecturer, Department of Computer Science and Engineering
Islamic University of Technology (August 2023 – Current)

Software Engineer I
Samsung R&D Institute, Bangladesh (May 2022 – August 2023)

Machine Learning Engineer (Intern)
Pioneer Alpha Ltd (May 2021 – September 2021)

Contact

Room #: 601, 2nd Academic Building.
Phone: +8801748563612
Email: asaduzzaman34@iut-dhaka.edu
Student Consultation: Thursday, 10:30 a.m. - 11:30 a.m.

Research Work

Image Captioning Using Scene Graph and Language Decoder
(B.Sc Thesis)

Cotton Leaf Disease Identification using Transfer Learning
(ICICT4SD)

Course Syllabus

- Introduction to Programming Concepts
- Algorithm and Logic
- Constants, Variables, Keywords and Data Types,
- Operators and expressions,
- Managing Input and Output Operations,
- Decision Making and Branching,
- Decision Making and Looping,
- Arrays, Multi-dimensional Arrays, Strings,
- User defined functions, Recursion,
- Structures and Unions,
- File Management in C,
- Pointers, Dynamic Memory Allocation and Linked List,
- The Preprocessor and some advanced topics,
- Advanced data types and operators.

Evaluation Criteria

Your evaluation in this course is based on the following components:

❑ 4 Quiz (Best of 3 will be counted)	20%	60 marks
❑ One Mid Semester Exam	40%	120 marks
❑ One Semester Final Exam	40%	120 marks
Total	100%	300 marks

- ❑ Some Bonus Marks may be awarded on class performance
- ❑ Class Attendance must be at least **85%** otherwise you will be barred from exam

Reference Books:

- ➢ C Programming: A Modern Approach (2nd Edition), Authored by K. N. King (Main reference)
- ➢ Teach Yourself C (3rd Edition), Authored by Herbert Schildt

You may find the hards copies in IUT Library. PDFs will be available in Google Classroom

Classroom & Material Management

Class Schedule:

Day	Time	Room
Monday	9:15 am – 10:30 am	205 AB2
Tuesday	8:00 am – 9:15 am	304 AB2

Teaching Aids:

- ➔ Multimedia & Overhead Projectors
- ➔ Board and Marker

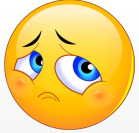

Material Management:

- ➔ Google Classroom: **64cmfbo** (You must use the email provided by iut)

Grading Policy

Numeric Grade	Letter Grade	Grade Point
80% and above	A+	4.00
75% to less than 80%	A	3.75
70% to less than 75%	A-	3.50
65% to less than 70%	B+	3.25
60% to less than 65%	B	3.00
55% to less than 60%	B-	2.75
50% to less than 55%	C+	2.50
45% to less than 50%	C	2.25
40% to less than 45%	D	2.00
Less than 40%	F	0.00

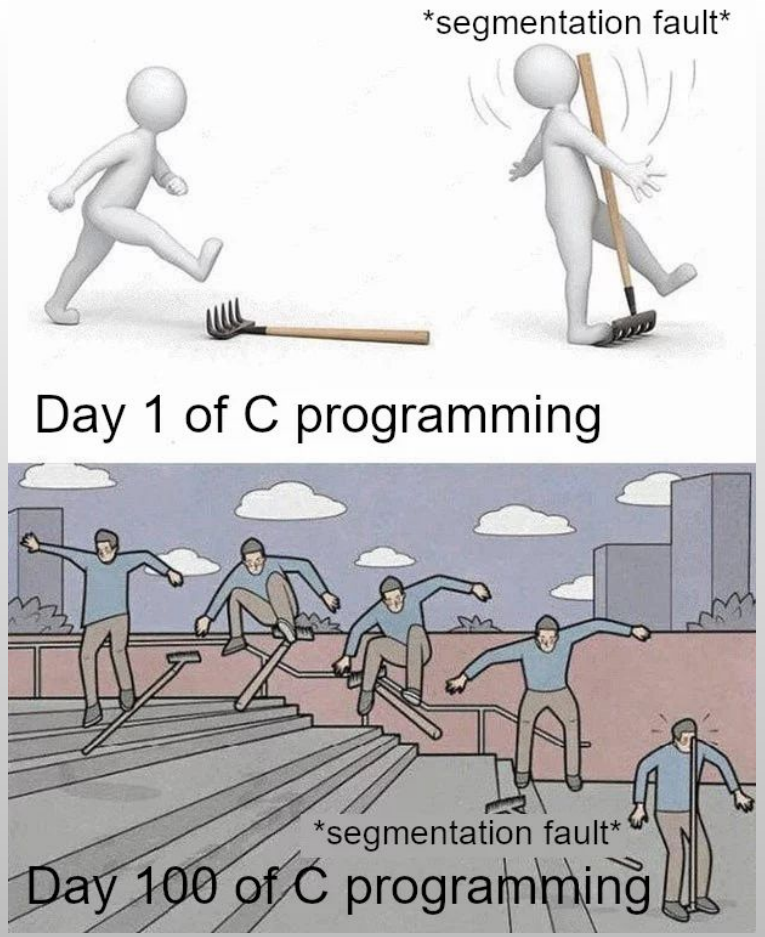

Rules & Regulations of this Class

- ➔ Late attendance: No attendance after 5 minutes of my arrival in class.
- ➔ Leave of Absence: Send an application mail from your iut mail with some proof documents. Email subject must be “Application for leave of absence”
- ➔ Advance Leave: Send an application mail from your iut mail with some proof documents. Email subject must be “Application for Advance Leave”
- ➔ Warning letter: You may get a warning letter for low attendance.
- ➔ Seating Arrangement: No mixing of opposite gender. Females should be on rightmost/leftmost column.
- ➔ Use of mobile device: If you have emergency, get out of the class, meet your emergencies and get back.

N.B: Rules may get changed/modified based t situations.

IMPROVING YOUR PERFORMANCE

The human brain can retain approximately 5-9 independent items of information in its short-term memory

George Miller, The Magical Number Seven, Plus or Minus Two: Some Limits on Our Capacity for Processing Information, Psychological Review, Vol.63 pp.81–97, 1956

The introduction of new information causes the brain to discard an item currently in your short-term memory

- For example, consider the 12 words which will appear on the next sequence of screens

Your goal: at the end, write down all twelve words

IMPROVING YOUR PERFORMANCE

```
Cat
```

IMPROVING YOUR PERFORMANCE

Ultimate

IMPROVING YOUR PERFORMANCE

Knife

IMPROVING YOUR PERFORMANCE

Asteroid

IMPROVING YOUR PERFORMANCE

Motion

IMPROVING YOUR PERFORMANCE

Shipwreck

IMPROVING YOUR PERFORMANCE

Vision

IMPROVING YOUR PERFORMANCE

Ford

IMPROVING YOUR PERFORMANCE

Pencil

IMPROVING YOUR PERFORMANCE

Metre

Curtain

IMPROVING YOUR PERFORMANCE

Forever

IMPROVING YOUR PERFORMANCE

Now, write down as many of these words as you can

- Most of you will be able to write down somewhere between 7 through 9 of these.
- Words: Cat, Ultimate, Knife, Asteroid, Motion, Shipwreck, Vision, Ford, Pencil, Metre, Curtain, Forever

IMPROVING YOUR PERFORMANCE

To transfer information from your short-term memory to your long-term memory, that information must be imposed on your mind at least three times

You should always try the following:

- Look at the topics before class
- Attend lectures
  - You see the information again with commentary
- Review the lecture during the evening
  - Rewrite and summarize the slides in your words

Acknowledgement

Rafsanjany Kushol
PhD Student, Dept. of Computing Science,
University of Alberta
