CSE 4107 (Quiz#1.2)
Total Marks: 15
Time 20 minutes

Student ID: _____

Q1 Make sure you have written your student ID 0

Q2 Given a 3-digit positive integer as an input indicating the last 3 digits of a student ID, your job is to write a program to determine in which lab class the student belong to. 10

The section is determined according to the following rules:

- The leftmost digit determines the section. If it is 1, then student belong to section 1, otherwise he/she will be in section 2.
- The rightmost digit determines the group. If it odd the student will be in group A, otherwise he/she will be in group B.

For example:

- if the student's ID is 124, he/she will be in lab 1B
- if the student's ID is 233, he/she will be in lab 2A

Q2 Examine the following program and expected output: 2+3

Program	Expected Output

`#include<stdio.h>`
`int main(){`
`  int i, j;`
`  for(i=99; i>90; i--){`
`  j = i %10;`
`  if(!(j%2))`
`  break;`
`  printf("%d ", j);`
`  }`
`}`
	9 7 5 3 1

Due to logical mistake, the program was not producing the expected output.
Determine the output of the given program and rewrite the program so that it produces the desired output.
[NB: Any unnecessary change will be treated as penalty]
